And **within 13 hour** I got it on 1st page of Google.

Yes, you heard right, Within 13 hour.

Check below screenshot...

10 On Page SEO Hacks You Use to Get Article on First Page of Google

Are you Struggling to get Your article on 1st page of Google?

If yes, then you are in right place.

Because, in this article I will give you 10 On Page SEO tips.

Believe me, If you use these tips in your article then I assure you that you will definitely get your article on Google 1st Page.

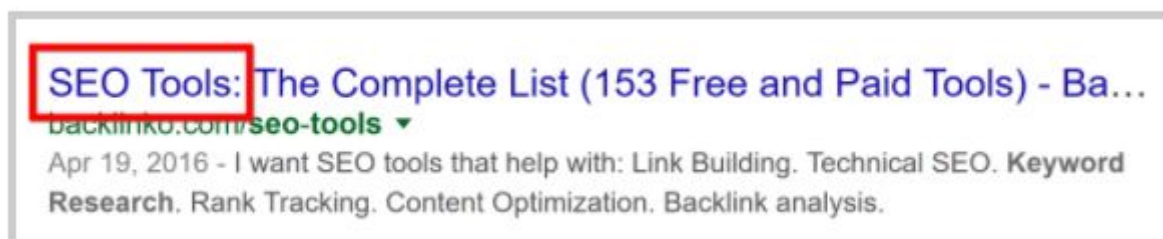

So, are you ready?

Let's dive in!

#1. Start Your Heading With Target Keyword

The main mistake many blogger makes in On Page SEO that they don't start their Blog Title with their target keyword.

Not only me but also pro bloggers like Brian Dean (Backlinko.com) also suggest their blog readers to start title with target keyword.

#2. Must Include Target Keyword in First and Last Paragraph

If you seriously want that On Page SEO works for you then while writing your blog post you must follow these 2 tips:

- Target Keyword in first 100 Words of your article.
- Target Keyword in Last 100 Words of your article.

It will help you to quickly boost your ranking in Google Search Result.

21 Actionable SEO Techniques You Can Use Right Now (Updated)

by Brian Dean

People that succeed with SEO do two things *very* well:

First, they identify **SEO techniques** that get them results.

Second, they put 100% of their resources into executing and scaling those techniques.

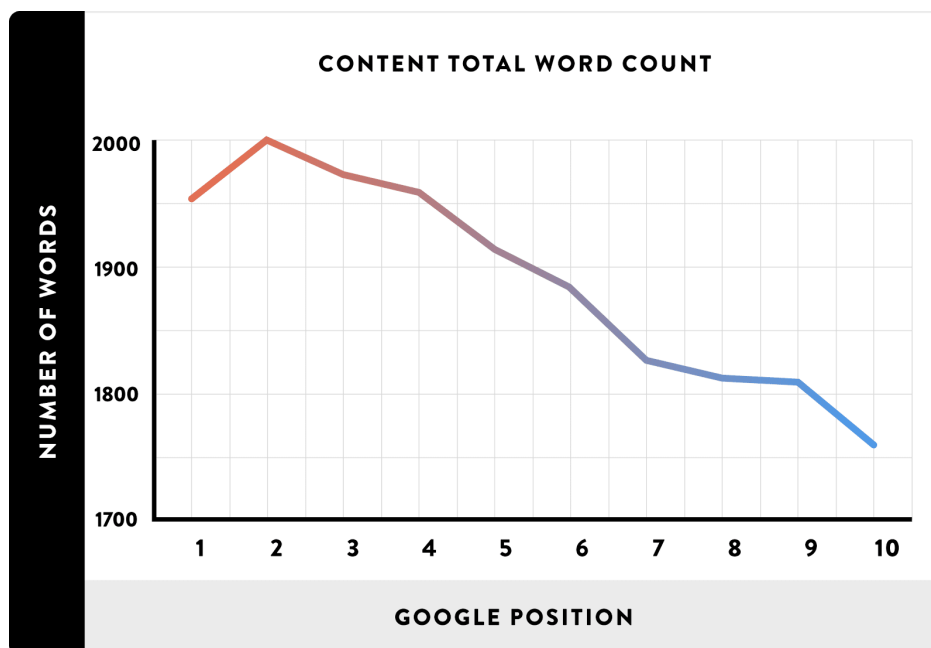

#3. Use Skyscraper Technique

This is the best way to defeat your competitors in Google Search result.

Just publish more detailed and long article then your competitor.

If your competitor publish blog post of 1000+ Word then you should publish 2000+ word article.

If will definitely help you to get your article in first page of Google.

#4. SEO Friendly URL

According to Google, First 3-5 words in URL are given more weight.

So, it's very necessary to make your URL Short.

Bad URL: blogginglift.com/p=123

Bad URL (Long URL): blogginglift.com/seo-is-so-amazing-its-the-best

GOOD URL: blogginglift.com/on-page-seo

Note: Must include your target keyword in your URL.

#5. Image Optimization

Make sure that at least one image of your blog post include your target keyword.

Like: On-page-seo.png

Also use target keyword in your ALT Tag.

If you use these tips then it will also boost your google ranking.

#6. Use Internal Links

Must include atleast 3-4 internal link in your blog post.

If you want example then see wikipedia.org

They uses lots of internal link in each article.

GoldenEye 007 is a [first-person shooter video game](#) developed by [Rare](#) and based on the 1995 [James Bond film *GoldenEye*](#). It was exclusively released for the [Nintendo 64 video game console](#) in August 1997. The game features a [single-player](#) campaign in which players assume the role of [British Secret Intelligence Service](#) agent [James Bond](#) as he fights to prevent a criminal syndicate from using a [satellite weapon](#) against London to cause a global financial meltdown. The game also includes a [split-screen multiplayer](#) mode in which two, three, or four players can compete in different types of [deathmatch](#) games.

GoldenEye 007 was originally conceived as an [on-rails shooter](#) inspired by [Sega's *Virtua Cop*](#) before

#7. Must Include 4-5 Outbound Link

If you are serious about getting your article in first page of Google then must give 4-5 outbound link to authority site.

Normally, I give 4-5 outbound link per 1000 words in my blog posts.

For getting better rankin, you should never ignore this tip.

So, Don't ever forget to use outbound links.

#8. Use Long Tail Keyword

If you want to quickly get good ranking in Google then use Long Tail Keyword.

Long Tail keyword can give you better ranking than short tail keyword.

Example:

Short Tail Keyword: On Page SEO

Long Tail Keyword: On Page SEO Checklist, On Page SEO 2018 etc.

#9. Target Keyword in H2 Tag

Must include your target keyword once in H2 Tag.

All pro bloggers recommend to include target keyword in H2 tag to get better ranking.

#10. Must Use LSI Keyword

LSI keyword is synonyms of your target keyword.

Google uses LSI Keyword to page relevancy.

So, it's very important to find LSI keyword for your target keyword.

But the biggest problem is:

How to find LSI Keyword for your target keyword?

Answer is simple:

Write your main keyword in google and below search result you can find LSI keywords which are related to your target keyword.

Check below example.

Searches related to on page seo

off page seo

on page seo wiki

on page seo tutorial

on page seo meaning

on page seo techniques

on page seo vs off page seo

on page seo checklist

on page seo checker

I hope you like this ebook.

Just use all these tips when you write your next blog post.

All the best.

Wait.... Wait.... Wait....
